MOXI

PRE AND POST CARE

PRE-TREATMENT CARE:

- Avoid alcohol at least three days prior to your appointment. This will help diminish the swelling after your treatment.
- Stay hydrated and avoid coming in on an empty stomach. This will also help provide comfort during your appointment.
- Please avoid at home exfoliating 5-7 days prior to your treatment, such as; at-home dermaplaning, shaving, masks and retinols. Please speak with your skin health provider about products or treatments you're currently using at home prior to your treatment to ensure the best outcome.
- Inform Medical Aesthetician if you have been on accutane in the last 6-8 months.
- Inform Medical Aesthetician or consult with your doctor if you are on any photosensitizing medications that could prolong wound healing, or affect coagulation.
- Avoid antibiotics 2 weeks prior to treatment.
- Please keep in mind injections can be performed after any Moxi treatment. You must wait 1-3 weeks after any filler, PRF or threads and 6 weeks after any Botox/Dysport treatment to receive a Moxi treatment.
- Avoid extended sun exposure/UV, i.e. beach, travel to sunny locations, sunbathing, sports, outdoors, long car rides in the sun, etc. and use a SPF 35 or higher 10-14 days leading up to treatment.
- No cold sores, open wounds, or warts in the area to be treated.
- You cannot be pregnant or nursing.
- No self tanner for 2-3 weeks leading up to treatment.

POST-TREATMENT CARE:

- To maximize your treatment, we recommend using Alastin Regenerating Skin Nectar or Plated Intense Serum and Alastin Soothe and Protect Recovery Balm to help with the healing process.
- The area will feel extremely warm for 1-2 hours after treatment. Warmth may continue 12-24 hours after treatment. Apply a cold compress to the skin for comfort as needed.
- Redness is normal and expected. Redness generally increases for the first few days after treatment with day three usually being the most intense. Redness can persist up to 7 days depending on intensity of the treatment.
- Swelling, itchiness, irritation, crusting, redness & pinpoint dots can occur after treatment for 7-10 days. MENDS (microscopic epidermal necrotic debris) will appear on the 2nd to 3rd day after treatment as tiny sand like texture or dark spots and treated area will have bronzed appearance.
- Avoid makeup and sunscreen for 24-48 hours.
- Avoid exfoliating or scrubbing the skin and using retinol, Vitamin C, and acids for 7-10 days or until skin is completely healed.
- Avoid exercise and high heat activities for 24-48 hours.
- Protect your skin from the sun for 7-10 days post treatment.
- Stay well hydrated.
- Avoid alcohol for 72 hours.
- Avoid hot tubs, hot showers, hot baths, saunas, and any excess heat for 5-7 days after treatment.
